## Traffic Calming Solutions

Radar Driver Feedback Signs provide a proven, effective, and affordable solution to calming traffic and reducing speeders in school zones, neighborhoods, city streets, parking lots, and more.

Radar Driver Feedback Signs give drivers notice that they are speeding. Tests repeatedly show that speeders WILL slow down over 80% of the time when alerted by a driver feedback sign. Typical speed reductions are 10-20%, and overall compliance with the posted speed limit will go up by 30-60%.

And with a YOUR SPEED radar sign the specific speeding message delivered to the oncoming driver is more effective than a generic yellow flasher.

Easily and safely secure the Battery powered Radar Speed Sign to multiple pole locations

**Locking Pole Mount System**

### Heavy Duty Mobile Stands

An easy way to add mobility to your traffic calming efforts.

These stands fit easily into the bed of a pick-up truck and can be handled easily by one person.

**Breakaway Post Assembly**  
(Customer to provide and set concrete base)

## Features and Benefits

- Available in A/C powered, Battery powered, and Solar powered models.
- The most vandal resistant signs on the market today. Designed for extreme durability, the radar speed sign can even withstand gunshots and sustain only minor damage.
- Energy Efficient. They require the lowest power consumption for operation than comparable products on the market today.
- Timer functionality to turn sign on and off up to 4 times a day.
- Versatile. By offering more flexibility and portability in mounting options, Radar Speed Signs can be used in multiple environments.
- BLUETOOTH Communication is included with all Radar Speed Signs, allowing wireless operation and data collection from you laptop - from within your vehicle.

# RADAR SPEED SIGN OPTIONS

## A/C Powered Radar Speed Signs
