STANDARD BARRICADE LIGHT

The optic system projects a rectangular pattern, meeting the I.T.E. specifications. Available with Photo Cell (solar switch) and Non Photo Cell. Available lens colors: Amber, Green, Red, Orange, and White (Please specify color when ordering). (Requires two 6V spring type batteries)

Steady Burn Photo Cell	#13300300
Steady Burn Non Photo Cell	#13300650
Flashing Photo Cell	#13300100
Flashing Non Photo Cell	#13300200
6V Spring Type Battery	#13500100
Case of 12	#13500200

4 D-CELL BARRICADE LIGHT

This light provides excellent performance versus cost. Three way switch allows user to switch between off, flashing, or steady burn. Low current draw allows light to operate in steady burn about 5-6 months and in flashing mode it will operate 7-10 months.
