WATER FILLED BARRIER

The Industry's Most Advanced Portable Plastic Barrier is a tough, versatile, portable, energy-absorbing, water-ballasted polyethylene barrier. It is economical and effective for many uses. This self-locking barrier makes it easy to connect and allows for curved configurations while locked together. Barrier will curve up to 15 degrees at each connection while remaining locked together.

Features Include:

- Only 125 pounds empty - Solid 1675 pounds when ballasted with water.
- Patented interior design prevents bulging and keeps sides straight and trim
- Light weight and easy to handle.
- 6 feet long, 3.5 feet high and 2 feet wide at the base.
- Carry slots for easier handling, fork-lift slots at bottom.
- Top inset slots for signs, screens, and flashers.

Corner Connector Barrier allows for 4-way left or right angle turns of 75 degree – 105 degree, while locking barriers together.

Size: 2.5 ft. x 2.5 ft x 3.5 ft

Weight: 50 lbs. Empty and 550 lbs. when filled with water.

JERSEY BARRIER DELINEATOR

One look at the JD series tells you this is no ordinary barrier delineator. It's bigger – 3" high and 5-1/4" wide. It's brighter – thousands of prisms, like six point stars, delineate the barrier hundreds of feet farther to approaching drivers. It's bi-directional – with reflectors both front and rear, so that one reflector does the work of two, delineating the barrier for vehicles traveling in both directions.

Model JD-1 (Mono-Directional)

White #15400100 Amber #15400300

Model JD-2 (Bi-Directional)

White #15400200 Amber #15400400

Solvent Cement #15400500

(will install approx. 35-40 reflectors)

Meets NCHRP-350

*Test level 2 and 3 when installed
with optional safety assembly.*

Please call for details

PORTABLE CONCRETE BARRIER REFLECTORS (PCBM)

Over 12 square inches of reflective sheeting, it exceeds federal standards for brightness. The PCBM can be used for top or side mount placement. It's added brightness gives motorists extra response time when driving through dangerous work zones at night. Constructed of a high-impact engineering thermoplastic, PCBM's bend upon impact and rebound to their original shape.

1 Way Yellow #15000102

2 Way Yellow #15000103

1 Way White #15000100

2 Way White #15000101

Other sizes
also available

Adhesive Tube #15005000 (Will apply approx. 20 reflectors)
