STANDARD TRAFFIC CONES

Cones are manufactured with fluorescent pigments compounded with ultra violet materials assuring maximum color life.

- 5" #15100070
 - 6" #15100080
 - 12" #15100100
 - 18" #15100200
 - 28" #15100300
- w/6" Collar #15100201 w/4" Collar #15100202
w/6" upper & 4" lower Collars #15100301

T-TOP DELINEATOR

We offer standard tubes which are constant in diameter and have a T-shaped handle on top. Some customers prefer this model because the t-top provides a good handle to easily move the cone.

- 28" w/reflective bands and 12 lbs. Base #52007
- 28" w/reflective bands and 18 lbs. Base #52008
- 42" w/reflective bands and 12 lbs. Base #52009
- 42" w/reflective bands and 18 lbs. Base #52010

TRIMLINE CONES

Trimline cones are narrower than a standard conical cone. Since it is narrower, it requires less reflective sheeting to wrap around it and thus less expensive. Many agencies prefer the trimline due its lower price and the fact that the narrower shape provides less "sail area" so the cone resists being moved by wind gusts.

- 28" #15100500
- With 6" upper & 4" lower Collars #15100501

TUBE CONES

Tube cones are two piece systems consisting of the upright "tube" and the "base" portion. Tubes come in 28" and 42" tall sizes. Bases are available in 12 lbs. and 18 lbs. Tube cones are typically used on construction jobs because they provide excellent channelization and resist movement from wind.

- 28" w/reflective bands and 12 lbs. Base **#52001**
- 28" w/reflective bands and 18 lbs. Base **#52003**
- 42" w/reflective bands and 12 lbs. Base **#52002**
- 42" w/reflective bands and 18 lbs. Base **#52004**

GRABBER CONE

The stem of the Grabber-Tube Cone is made of flexible yet durable fluorescent low density polyethylene material, with UV inhibitors to minimize fading. Convenient grabber handle design allows for easy movement and placement of Grabber-Tube. 100% recycled rubber bases.

- 28" w/reflective bands and 12 lbs. Base **#52020**
- 28" w/reflective bands and 18 lbs. Base **#52025**
- 42" w/reflective bands and 12 lbs. Base **#52030**
- 42" w/reflective bands and 18 lbs. Base **#52035**

CHANNELIZER DRUM

The unique design of the Lifegard® completely eliminates the need for sandbags as ballast, saving time and labor costs. The drum will separate on impact leaving the rubber base in place. Meets MUTCD standard 6F-5e.

Base is made from recycled truck tires. Drum is made with U.V. stabilized recycled polyethylene.

- Engineer Grade Stripes **#53007**
- Hi-Intensity Stripes **#53008**
- Tire Base Only **#15300900**

NAVIGATOR® CONE

Made of low-density, polyethylene, the Navigator meets M.U.T.C.D. standards.

Features:

- Break-away Design
- NCHRP-350 Compliant
- Saves space in truck or in storage
- Greater visibility than standard 18" cones
- Molded hole for mounting signal
- Handle can also serve as roping-off mount

42" Cone with 16 lbs. Base **#51000**

Stenciling available, please call for more information.
