

Radar Speed Trailer Sign

**TRAFFIC SAFETY
SUPPLY COMPANY**

PROVEN TO WORK

Speed radar display signs have been shown to slow drivers an average of 10%, usually for several miles down the road. In most cases, drivers will slow down when they see that they are driving too fast. Radar speed signs tend to have the greatest effect on streets where vehicles average at least 10 mph over the posted speed limit.

DATA COLLECTION

The data collection feature, an added option available with every SafePace sign, offers a valuable resource for gathering and analyzing sign performance and driver behavior. Traffic data, statistics and reports can be downloaded from your sign location with Bluetooth or wifi connection or can be accessed remotely from anywhere for SafePace Cloud users.

SAFEPACE CRUISER LT

The SafePace Cruiser LT speed trailer is a lightweight, economical radar trailer with all the features you need for portable speed control. The versatile speed trailers deploy in less than 3 minutes with a simple crank that allows you to raise and lower the sign face. The sign face can be simply rotated toward traffic, allowing you to park the speed trailer in any position. During travel, the sign can be pivoted for wind protection. A speed limit sign with changeable numbers displays current speed limits. The lightweight trailer offers the portability you need to protect your streets.
