EASE OF COMPUTER PROGRAMMING

A user-friendly dedicated computer reduces the number of keys required to program the Message Center. The unit provides NTCIP compliant functionality.

LED LAMP PIXEL DESIGN

The SMC 1000 ST uses 5 high-intensity, solid-state LEDs per 2-inch pixel. This creates a more uniform light output in each pixel, resulting in increased message definition and distance legibility.

INDUSTRIAL-GRADE STRUCTURAL STEEL TRAILER

The SMC 1000 ST uses a durable trailer system designed to provide years of dependable service. The trailer's high-quality powder-coat finish, 2"x 4" 11-gauge steel frame and a 3,500-pound suspension system enhance the overall quality of the unit.

MODULAR ELECTRONIC COMPONENTRY

The entire system was developed with the operator/end user in mind. Electronic components are easily replaced, reducing downtime and maintenance costs. This modularity also improves system diagnostics.
