

Snow Poles

**TRAFFIC SAFETY
SUPPLY COMPANY**

PRODUCT DESCRIPTION

The snow pole has the ability to flex when covered with snow and return to its upright position without bowing or becoming brittle.

Round snow poles are a highly visible target from any angle of approach, showing operators where to plow safely. Add reflective sheeting for a more visible nighttime target.

Triangle-shaped snow poles can be installed in existing metal U-Channel with the use of the rubber compression fitting supplied with the snow pole.

SPECIFICATIONS
