## IceAlert

IceAlert indicators warn employees, customers, and visitors of possible icy conditions by changing color from white to blue as temperatures approach freezing. Units are easily installed at building exits, near stairs, walkways, and in parking areas.

## FEATURES

- Color change makes temperature visible to employees, customers and visitors.
- Reduces the risk of winter slip and fall accidents
- Easily installed stand-alone units use no electricity or delicate electronic components.
- IceAlerts are rugged, reliable, and very cost-effective.
- Order now, install next week!

## HOW IT WORKS
