

Railroad Traffic Markers

**TRAFFIC SAFETY
SUPPLY COMPANY**

DESCRIPTION

Railroad Track Markers are used to help communicate different types of actions to operators within the railroad yard. They can also help to identify special areas of caution in order to improve safety. All messages are customizable for your need. With their bright High-Intensity Prismatic sheeting and tough polyurethane backing, these markers are made for the track. They are weatherized to protect against the elements and remain reflective for years to come. They are also very easy to install!
