Smart Sequential Road Flares

Advanced Traffic Guidance and Safety

»»» IMPROVING TODAY FOR A SAFER TOMORROW

PRODUCT OVERVIEW

PRODUCT NO. - DP07714 (Orange 10 Pack)

These road flares incorporate an innovative radio-linked network to automatically sequence the flash. Flares turn on automatically when removed from the case for easy and rapid deployment. The tilt sensor directs light output to optimize approaching driver awareness. Approaching drivers see a sequentially lit string of flares, much like a runway landing strip that guides traffic around the incident or work zone.

The kit includes a carrying case which also charges the flares, DC 12/24V Vehicle Plug, AC 110/240V Wall Plug and includes a 2 Year Warranty. Available as a set of 10, 6 or 4. Use with our cone adapter for added convenience and safety.

FEATURES & BENEFITS

- **Gravity-Controlled Light Output**
Ensures optimal visibility by adjusting the light output according to the flare's orientation.
- **Automatic Synchronization of Flares**
Flares work together seamlessly, creating a synchronized pattern for enhanced safety.
- **Long Runtime**
Enjoy over 20 hours of operation (runtime varies based on flash pattern).
- **Reverse Sequence Mode**
Offers versatility by allowing you to change the sequence direction to fit your needs.
- **Simultaneous Charging**
Conveniently charge all flares at once for minimal downtime.
- **Lithium-Ion Rechargeable Battery**
Reliable and eco-friendly power source for extended use.

PRODUCT SPECIFICATIONS

- 2.4 Ghz radio-communication (FCC compliant)
- 50,000 lbs (26,000 kg) of crush strength
- IP67 Water and Dust Proof Rating
- 50+ feet (15 meters) range on ground (330 meters on top of cone)

Flare Models:

Rechargeable
"Professional" Set (ICSSG2xx-#RE)
1750mAh Lithium Battery
(20 hours of continuous flashing)

RDS	Set Sizes:	Color Options:
YES	10 Flare 6 Flare 4 Flare	

PRODUCT NO. - DP08373

Docking Station

The docking station provides an easy insert/removal of your sequential flares. Bolt the station onto your vehicle, connect to power and it's ready to go! Securely holds the flare set while charging. The system will always be there, and fully charged.
