# Post Picker

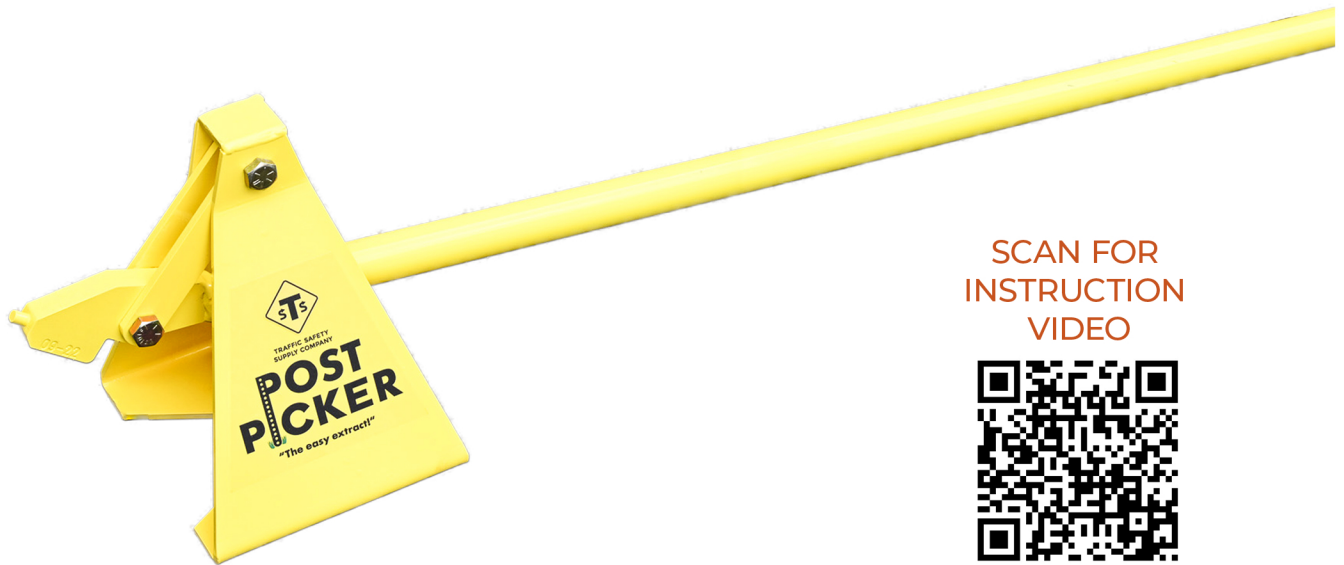

"The easy extract!"

»» IMPROVING TODAY FOR A SAFER TOMORROW

## PRODUCT DESCRIPTION

PART # DP02747

Our Post Picker allows you to quickly and easily remove U-Channel and Square Sign Posts, as well as wood posts drilled with a few small holes. The tool applies 2+ ton of upward force when the handle is pushed down, causing the U-Channel or Square Sign Post to rise out of the ground. The Post Picker is made in the USA.

## INSTRUCTIONS

- "Ring the bell," hit the post to loosen fit in post sleeve or solid ground.
- Make sure base is flat on the ground and unit is as tight to post as possible. If using on very soft ground, place a board under the base.
- Engage shear pin in post hole, making sure that the handle is about hip height.
- Pin must be inserted completely into post hole so no amount of pin is visible between head of unit and post. If pin is not fully engaged it may damage/bend pin and Post Picker will not work optimally.
- Once pin is fully engaged apply downward pressure on handle.
- For maximum life of your shear pin, only operate in hip to knee range (or one post hole/inch at a time.)
- Because of the Post Picker's unique design, it will only take a small number of cycles to remove the post!

NEVER PLACE A BAR (CHEATER BAR) ON HANDLE TO GAIN MORE LEVERAGE, THIS WILL DAMAGE THE UNIT AND VOID THE WARRANTY!
